

YI-CHUN CHEN

EXPERIENCE

- ServiceNow**
Staff Product Designer

Mar 2024 – Present

 - Developed multiple building experience visions for ServiceNow Studio, AI-Native Experience, UI Builder, and Service Catalog, with cross-functional leaders, leading to successful allocation of engineering resources.
 - Led the 0-1 UX of the ServiceNow platform module editing experience, enabling low-code platform admins to create rich UI pages with platform data without code.
 - Launched the interoperability framework design at UI Builder, saving resources for multiple business units and reducing time-to-value for customer developers.
 - Created and led the maintenance work of the component and design pattern library for UI Builder, improving team design consistency and efficiency.
 - Identified opportunities to align conflicting taxonomies across key user touchpoints through comprehensive audits and 10+ expert interviews. Presented findings to design leadership, resulting in their escalation for faster cross-team alignment.
 - Delivered training sessions to 60+ internal designers, enabling independent design feasibility assessments and driving efficiency and design quality.
- Sr. Product Designer**

Mar 2022 – Feb 2024

 - Improved UI Builder's layout system, increasing task completion rate from 20% to 100%; optimized the page creation flow, cutting average task time by 50%.
 - Developed UI Builder's generative AI strategies and visions with product leaders to accelerate time-to-market for enterprise app development.
- Product Designer**

Jun 2020 – Feb 2022

 - Led the launch of a point-and-click data-binding feature in UI Builder, driving a 20x increase in dynamic data-binding usage.
- Zell Lurie Institute, University of Michigan**
UX Designer

Sep 2019 – Apr 2020

 - Redesigned the CMS of a nightlife marketplace app by transforming it into an inventory management platform. Reduced the number of clicks to edit inventory by 50%.
 - Envisioned a background check mobile app with the startup founder to foster trust between gig workers and customers. Created the V1 design that served as a cornerstone in investor pitches and secured an accelerator program.
- Clinc, Inc.**
UX Intern

Oct 2019 – Dec 2019

 - Revamped the user landscape and identified eight key challenges of the enterprise AI platform. The findings led to the company's 2020 roadmap.
- Essential Products Inc.**
UX Research Intern

Jun 2019 – Aug 2019

 - Conducted multiple usability studies and communicated research insights for continued iterations for an Android-based OS on a unique smartphone form factor.
- Synology Inc.**
Marketing Specialist

Oct 2016–Jul 2018

 - Led all marketing strategies and designed collateral for multiple English-speaking markets to promote the hybrid cloud, data protection, and networking solutions.
